Portfolio: <https://garyolacsi.github.io/portfolio2026/>

Los Angeles, CA

SUMMARY

Experienced Principal UX Designer leading and delivering delightful end-to-end user experiences in complex SaaS Enterprise systems for Entertainment and Healthcare clients. Elevated product visions through collaboration with users, cross-functional teams, and stakeholders, translating client data into actionable information architecture and interactive prototypes.

EXPERIENCE

NavEase, LLC (Principal, Owner since 2017), Los Angeles, CA 10/24 - 4/26

Author

- Synthesized research and practitioner case studies to author Human Factors Engineering manuscript
- Acquired publishing ecosystem knowledge (formatting standards, ISBN registration, and copyright licensing)

SunDoe, Inc. (Walt Disney Studios Contract) – Culver City, CA 10/20 - 7/24

Principal UX Designer & BA

- Defined IA and requirements for a 0-to-1 SaaS scheduling platform through benchmarking and user research, closing 73 requirement gaps pre-build.
- Cut scheduling time 62% by designing the end-to-end workflow for a greenfield TV production platform replacing fragmented legacy tooling.
- Aligned 4 teams on a unified design direction by facilitating design reviews that reconciled competing business goals against technical constraints.
- Shaped UX strategy for a Salesforce film and TV rights-tracking system, delivering recommendations that reshaped how the platform modeled rights.

SunDoe, Inc. (20th Century Fox TV Contract) – Culver City, CA 5/17 - 2/20

Principal UX Designer & BA

- Collapsed multi-system status lookups into one real-time screen by designing a consolidated, slate-level dashboard for production leadership.
- Mapped 60 union agreements into one decision reference attorneys adopted for live negotiations, eliminating manual rule lookup per deal.
- Streamlined payroll onboarding steps by 31% through a usability evaluation that converted findings into prioritized design recommendations across labor agreements.
- Help Desk support dependency reduced by 27% by redesigning support workflows and delivering a prioritized set of strategic UX recommendations.

Providence Health & Services Contract – Seattle, WA 9/14 - 9/16

Senior UX Designer & Information Architect

- Built IA for a multi-product telemedicine suite, cutting downstream dev time 41% by delivering engineering-validated workflows as high-fidelity prototypes.
- Cut provider task time 34% by driving end-to-end design across three products: patient scheduling, provider directory, and a PCP workflow tool.

- Built the design system and interaction patterns unifying 5 patient- and provider-facing surfaces across the telemedicine suite.

SunDoe, Inc. (20th Century Fox TV Contract) – Culver City, CA

6/13 - 11/13

Principal UX Designer

- Lifted task efficiency 41% by architecting a studio Rights-In distribution system that scaled to ten rights types without redesign.
- Cut interaction steps 33% across core rights workflows by designing end-to-end prototypes engineering built against directly.

Zynx Health Contract – Los Angeles, CA

5/11 - 5/13

Senior UX Designer & Information Architect

- Cut clinician optimization time 29% by designing an end-to-end web tool that converted manual CDS review into a structured workflow.
- Cut gap-analysis time 34% by designing a CDS assessment report that turned checklist results into prioritized, physician-readable findings.

TAPFIN Talent Solutions (FreeCreditReport.com Contract) – Los Angeles, CA

12/10 - 3/11

Senior UX Designer & Information Architect

- Designed 4 core credit-reporting screens in Axure, spanning the Score Planner (Basic, Advanced) and Report Center (Ordering, Document History).

Walt Disney Internet Group (Contract) – Burbank, CA

8/09 - 10/10

Senior User Experience Designer

- Cut producer reliance on tech support 72% by designing a WYSIWYG SaaS CMS that let nontechnical users publish sites independently.

Hitachi Vantara (Beckman Coulter Life Sciences – Brea, CA

7/08 - 2/09

Senior Consultant – UX Design and Information Architecture Area Specialist

- Drove an eCommerce site from concept to validated prototype, including the taxonomy and UI standards engineering and leadership built against.
- Shaped product direction across 3 workshops that surfaced needs pre-build and converted findings into prioritized decisions stakeholders acted on.

SKILLS

Core Design Competencies	UX/UI Design, Information Architecture, Wireframing, Interaction Design & Rapid Prototyping, Workflow Design/Optimization, Responsive & Accessible Design, Visual Design, User Story & Acceptance Criteria Creation
Research & Evaluation	User Research, Heuristic Evaluation, Usability Testing, Contextual Inquiry, Ethnographic Interview, Benchmarking, A/B Testing, Business Process Mapping, User Journey Mapping, Persona Creation, Taxonomy Workshops, Task Analysis, Gap Analysis, Data Analysis & Visualization
Strategy & Leadership	Operational Efficiency, Design Strategy & Vision, Stakeholder Engagement, Cross-Functional Collaboration, Business Process Improvement, Product Roadmap Software Development Life Cycle, Workshop Facilitation
Tools & Technical	Axure, Figma, Agile/Scrum, Tracking & Documentation Platforms (Jira, Confluence)

Domain Expertise

Saas Enterprise Systems, Executive Dashboards, CMS, B2B Saas, Systems Integration
Enterprise Integration Entertainment: TV/Film Production & Payroll (Hours-to-Gross) Accounting
Systems, Rights Distribution Systems (Rights-In) & IP Option/Purchase Agreements
Healthcare Enterprise Software: CDS Content Optimization (Order Sets, Nursing Care Plans,
KCP Checklist

EDUCATION**Virginia Tech**

Ph.D. and M.S., Industrial & Systems Engineering, Human Factors Engineering and Ergonomics Option

California State University Northridge

B.A., Psychology, (Applied Experimental Emphasis)
